from which poissed to the 146 % it declined to 146 %,
from which poissed to the standard closed at 146 %.
Loss was made with the standard carry in the forenoon,
but the open to the standard control of the standard control o

Mining stocks were buoyact, and at the first board the chief activity was confined to Coryston and La Crosse. The former closed 35c, higher than at the same time on Saturday, selling at \$1.20, and the latter sold up to \$5.50, or 55c, higher. Nye advanced 5c, selling at 60c. At the second board Coryston was lower, selling at \$6.95 a \$6.70. La Crosse was firm at \$5.50. The main a 26 70. La Crosse was firm at 25 50. The main cause of the revival of public interest in Colorado gold mining enterprises is to be found in the reduction of the cost of transportation to and labor at the mines, the miners now receiving \$3 50 a \$4 per day only, whereas they formerly demanded \$5 a \$6. It is easily seen that the difference in the cost of mining then and now would be sufficient in many instances to turn the scales between profitable and unprofitable working. Honce we find properties which have been lying kile for years up to within a few months, now the scene of vigorous operations presenting highly product.

scene of vigorous operations presenting highly product-ive result. Unlike the stocks we have named and a few others, however, many of those deal; in represent

undeveloped property of very questionable value, and therefore a keen discrimination must be exercised in the purchase of mining shares. The great fault of nearly all the companies organized some years ago lay in the ab-sence of a sufficient working capital to start with, many of them being mere stock speculations.

The earnings of the undermentioned reads during the

The completion of the Texas Railrod, connecting New Orleans with Texas is at present editing considerable attention in the city mentioned. Texas, regarding this as a most important project for her nervests, some time tage constructed a railroad from Hesston to Orange, sa the Subice river. Louisians, or rather New Orleans, did little more than to carry forward the Opolousus read to Berwick's bay, and there the west stopped, with the exception of a survey of the rest of the route, and the grading of about sixty miles to New Iberia. The New Orleans Creekint say, respecting the project:—It is time now to take up this magical enterprise, carry it forward to completion, which work can, and we doubt not, be accomplished withing two years, if proper efforts be made.

not, he accomplished withly two years, it proper scores be made.

The Lynchburg Virgarian states that there is some probability of the completion of the Manassas Gap Railroad. Mr. Marahet, President of the Manassas Company, contradict the statements of the Harrisonburg (Va.) Commanded the published in the Haraho of Saturday last), and says he made two distinct proposals in writing to the Baltimore and this Company. The first was a shirt lian of \$45,000, for the purpose of immediately infishing the road from Strasburg to Kratzers. The other proposal was a loan of \$100,000, which, with the years at the command of the Manassas Company, many to be used in the construction of the road between whichester and Strasburg.

whether and Straeburg.

The Jeffersonville, Madison and Indevnapolis (Indiana).
Ralicoad Company have in contemplation the extension of the Rushville branch of their road tes Cambridge City. Wayne county, and to this end have calk id a meeting of the stockholders of the company, to be held at Jeffer-sonville on Tuesday, November 13, to consider and deter-mine the proposition, and to ratify a contract made for that purpose.

BROOKL TH INTELLIGENCE.

parties a mines, agent of a canal boat, and the cost agness, Rathburn & Co. The facts as set forth are that the agent, in collecting freight on a boat load of coal, represented to the consignees of the cargo that \$41, the expenses of discharging the coal, had been paid by the captain of the boat, on which representation they paid the freight, and were subsequently compelled to pay the \$41 to the parties who discharged the coal. They then brought as action against Ames, and caused his arrest on the ground that the debt had been fraudules for contracted. The Justice who issued the warrant for the arrest dismissed the action on the ground that Aries was only an agent. Ames then brought the presert action, calming \$5,000 damages. The jury was in attracted by the Court that if Ames made the representations as
